For more information – www.colostrumresearch.org is an amazing web site dedicated to 1000's of documented case studies, on the benefits of Colostrum.

Colostrum is the first food of life! Immune and growth factors in colostrum provide the newborn with the essential nutrients needed to begin a healthy life. Intended to be the first substance a newborn ingests, it is safe for all ages. While it's relatively new on the market, colostrum has been used for thousands of years to help maintain the health of people worldwide. For adults, supplementing with colostrum can help restore and sustain health. All Colostrum IS NOT the same. From start to finish, Colostrum harvested from cows raised in New Zealand is superior to any other Colostrum in the world. This is all due to the ideal pure climate, pesticide, antibiotic and BSE free pasture-fed cows, highly regulated farming techniques, and a multi-million dollar investment in the equipment necessary to best process Colostrum properly.

No other Colostrum can compare.
